

Axil

BYRNE

Axil X

Axil X marks the spot, providing a new take on horizontal-mount desktop accessories and bringing power and data right to your fingertips. Axil also delivers a fresh look with a selection of new colors – but all the same great capabilities.

Axil Y

Meet Axil Y, Byrne's first vertical-mount, clamp-on desktop power and data accessory. Expandable in capacity and customizable with a wide range of embedded options, Axil Y really takes easy-install power solutions to new heights. Its innovative, vertical design takes up less real estate on the work surface, while creating a one-of-a-kind aesthetic.

Axil Z

Flat surfaces have always been off-limits when it came to power and data – until now. Axil Z is Byrne's flat mount power/data center, featuring a newly engineered and patented Spill-Proof Technology outlet – a design that delivers a groundbreaking, UL-listed solution parallel to any work surface and is available in Hospital Grade. Constructed out of anodized aluminum and laser-cut steel, Axil Z is a robust, scalable and customizable power/data solution.

Axil M

A new member of our popular Axil family - Axil M is a freestanding, monument style accessory. It's available in 2, 3, or 4 port sizes, so it's perfect for personal use or shared workspaces. Plug in laptops, phones, tablets easily – without reaching under the table. With plenty of options for braided cord too, Axil M can easily blend in or stand out in any space.
