

A photograph of a wooden desk with a silver power strip. The power strip has a USB port, two USB-A ports, and two AC outlets. A white power adapter is plugged into one of the AC outlets. A white cable is plugged into the USB port. In the background, a black office chair and a laptop are visible. The text 'M2X' is overlaid in the center of the image.

M2X

M2X

M2X

Power to the people. And with Byrne's new M2X power data solution that means a whole lotta power to a whole lotta people. Designed for high density user areas, the back to back design is ideal for applications that require additional capacity with minimal footprint. It is constructed of clear anodized aluminum and scalable to offer the most flexibility of any product of its kind.

M3X

Three's company. Powerful company. Seriously, look at this beauty. Byrne's new M3X power and data solution delivers the goods on three full sides. Created specifically for high-density user areas, this unique configuration is ideal in conference tables and collaborative spaces.

M4X

More power? You want more power? BAM! Byrne's new M4X power and data solution packs the most powerful (and data-full) punch in our MX lineup. M4X was created specifically for high-density user areas that require maximum capacity with a minimal footprint. Wow--we still can't get over this one! M4X features a newly engineered and patented Spill-proof outlet and is UL listed and available with a 15 Amp cord, Byrne Interlink, Byrne Interconnect, or hardwire versions.
