## Levity®

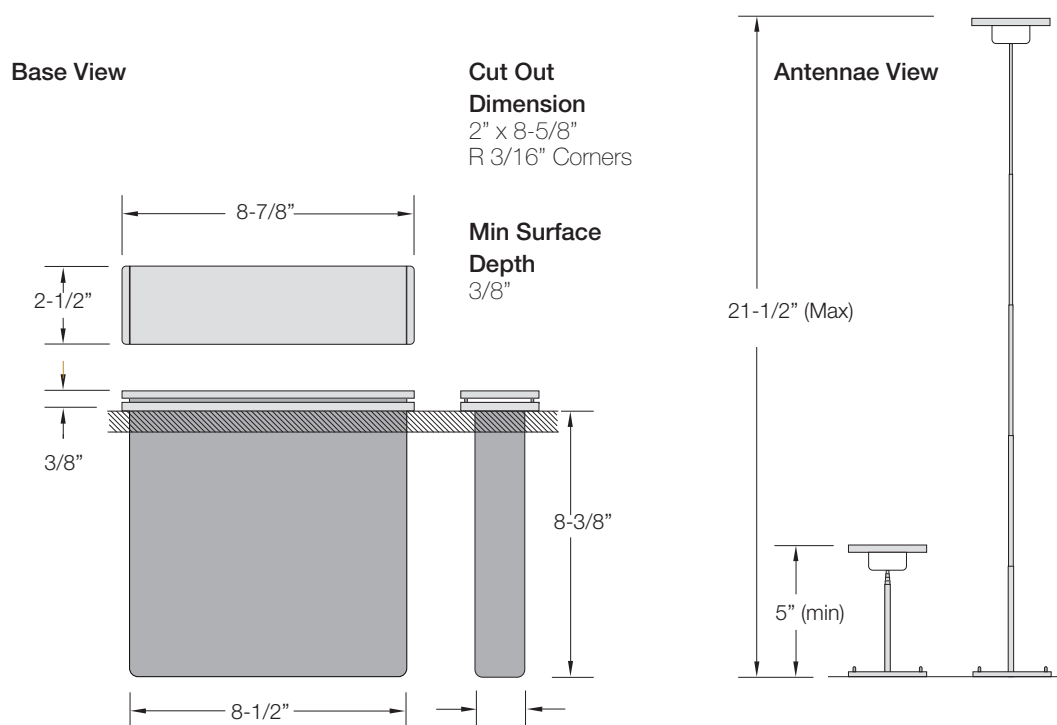

\* Image shown: 1 Power, 1 dual USB in White with Anodized Aluminum

### OVERVIEW

Offering a very flexible light pool, Levity is the only task light of its kind that retracts into the work space. Byrne's new hybrid of task light and power/data center was designed to be flexible and adaptable in order to fit many different work environments; private offices, benching, conference rooms or tabling. Combining a light source with accessibility to power and data technologies allows these environments to offer unlimited flexibility while having little impact on the work surface. The capabilities of Levity are there when you need them... and are completely hidden when you don't.
