EW2X

OVERVIEW

Smartly designed with generous proportions below the worksurface, Ellora Well already takes on the largest adapters out there—including those Mac power bricks—so tech can charge fast and out of sight. It just doesn't get any more powerful than that... unless you double it. Meet Double Ellora Well, EW2X for short. With EW2X, you'll find the same deep well design, and the same wide range of power and USB options to accommodate any team—but with easy access from both sides, for more space to plug in. It's the perfect choice for media sharing tables. And it's all still tucked under a seamless, soft-closing lid to deliver a modern, streamlined appearance.
