## HEIGHT ADJUSTABLE | FIXED DESK DESKS KITS

Pattern makes it a cinch to generously space power across any busy work environment to just where it's needed. This clever kitted solution is perfect for height-adjustable desking, benching, perimeter tables and more. Side by side or back to back. And the big surprise? Pattern only needs a single outlet to get the job done. No hardwiring, no hassle. Just choose a small, medium or large kit based of your desk size — in 2, 4, and 6-piece accessory packs. Curly or extended cord options easily solve for height differences too. 15 Amp corded infeed. All the power you need, all in one kit. Now, that's a Pattern worth repeating.
