

A woman with blonde hair in a ponytail, wearing a green turtleneck sweater, is seated at a long, light-colored wooden conference table. She is focused on her laptop. The table features integrated black power outlets on its side. On the table, there is a silver water bottle, a smartphone, and some papers. Two large, modern pendant lights with grey and white striped shades hang over the table. In the background, a window with white blinds looks out onto a brick building. The overall atmosphere is professional and modern.

Pattern for Conference Tables

Pattern

CONFERENCE TABLE KITS

Pattern is our kitted superstar that powers any collaborative center with easy access around the table perimeter – right where you need it. Just choose the best kit size for your crew with 4, 6, or even 8 mounted accessories. But here's the big surprise. Pattern only requires a single outlet to get the job done. Its mighty 15 Amp corded infeed installs at either the edge or center of the table...whatever works for you. No hardwiring, no hassle. For the generously-spaced power your busy conference room needs, Pattern does it all – all from one box.
