

# BYRNE

## E2X Storage Tray

### OVERVIEW

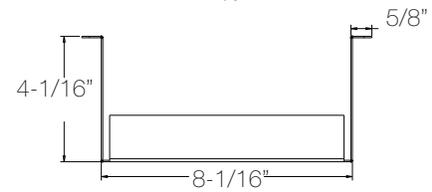

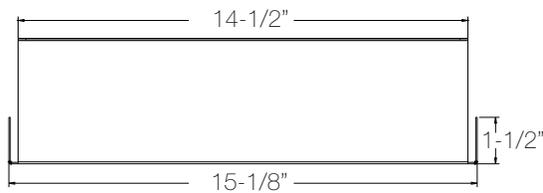

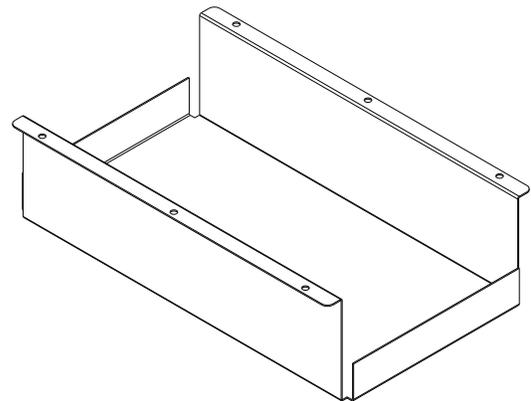

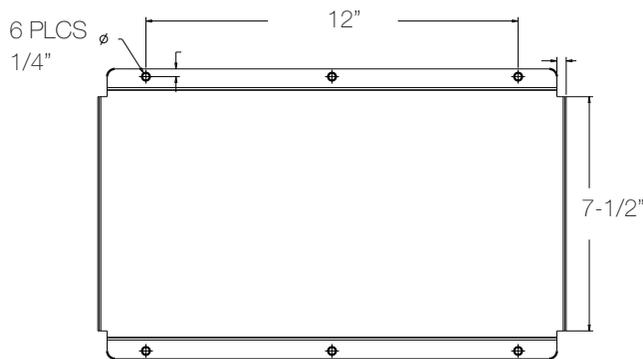

---

Byrne's E2X back-to-back Ellora power and data center keeps cables out of sight above the table, and its counterpart, the E2X storage tray manages cord clutter beneath the surface. The E2X Storage Tray is an easy-to-install, simple solution for cord management. Designed specifically to fit E2X, it can also be used as a wire management tool wherever unwanted cords and cable cause clutter beneath the work surface.
