

A white, rectangular desk-mounted power outlet is shown on a dark wood-grain desk. The outlet's lid is propped open, revealing a standard AC power socket, a USB-A port, and two additional AC power sockets. A white power cord is plugged into the top AC socket, and a white USB-C to Lightning cable is plugged into the USB-A port. In the foreground, a white smartphone is connected to the USB-C cable. The background shows a blurred office setting with a laptop and a chair.

Ellora B

BYRNE

Ellora® B

Ellora B

You know how just about every party finds guests hanging out in the kitchen? Well, think of Ellora B as our kitchen. In any workspace gathering, this is where the action is. Ellora B comes available in 4-port and 6-port versions with enough power and usb data access to feed your team's charging needs. And all this tucked under the generous, soft-closing lid for a clean, streamlined appearance. Where work happens, Ellora B is the place to be.

Double Sided Ellora B (E2XB)

One of our most powerful power solutions just got even more... powerful. Meet Double Ellora B, E2XB for short. It offers the same seamless in-surface design as our classic Ellora B. The same scalable power and data options too. But doubled—so it can deliver easy access from both sides of the table, for more space to plug in. If you're already using Ellora products in your workplace, E2XB is the perfect way to add serious two-sided power while maintaining the same clean, modern look. And all with a generous, soft-closing lid that hides cord clutter neatly out of sight. For the power to make any team twice as powerful, it's Double Ellora B.
