## Branching Power Kits for Lounge Furnishings

## LOUNGE KIT FEATURES

---

Thoughtfully designed, preconfigured power kits, that split access to power in multiple directions, with just one plug. Lounge Branching Kits were specifically created for hard-to-reach spaces, like behind a bed or sofa. These kits plug in to a standard outlet, and run power up to where its useful, so there's no more moving furniture to find a place to plug in. With integrated power units for soft seating and headboards, and freestanding power for table tops too, plugging in and branching out has never been easier.

- 15 Amp Corded Infeed
- Access to power where it is most convenient
- Multiple power units connected with one single cord
- Preconfigured kits designed for various furniture styles and preferred installation type
- Cord length and mounting styles designed to work with most common sofas and headboards
- Cord management included

## POWER ENTRY
