

OVERVIEW

Workplaces evolve and at Byrne, we are constantly adapting our products to power them. Open offices provide greater access to coworkers, enhanced ability to collaborate, and provide transparency for employers, but where does the power go? We created Hydra to power a single desk, whether the desk is against a wall, grouped up in an office, or in the middle of an open space. Hydra features a desktop accessory connected to a 4, 6, or 8 power utility power box under the desk. With multiple power and design choices, we're certain we have the right choice for you!
